Attachments: May Creek Landfill TCRA fact sheet.pdf

Hopefully closing the loop with the right people:

I've attached the handout that Jeff Fowlow and I delivered to the neighbors around the May Creek site. I pinned one up in Jay Berry's, and another in Keppler Feed and Recycling. We put them in all the doors around the loop of 155th Ave SE (above the work site) and we talked to a few of the people who were home while we were going door to door there. None of those neighbors were concerned, and they appreciated the outreach.

The people who are the most concerned are the neighbors directly to each side of the Pillon property. Please keep them informed directly of plans for the site.

Julie Hardebeck
425-591-7234
Home and horse stables just east along Renton-Issaquah Road

Also please keep Randy and Stacy Polajzar informed – 425-233-2394 – they're allowing us to use their property to stage our equipment adjacent to the site. They live elsewhere.

My phone number is on the handout, so people in the area may continue to call me. If you're willing to keep us in the loop on what the County and Ecology decide to do that would be great. That way if anyone calls me I won't, you know, sound like a dope .

I hope this is useful.
k

Hi Jeff and Wally,
I have passed this on to our PIO Doug Williams and he will work with Ecology to respond to neighbor and coordinate transition.

Thanks, Jim

Hi Tom and Jim,

As Jeff explains, the team will be demobilizing from the site by Saturday after concluding this phase of our effort. Though we will return to the site for the installation of the groundwater monitoring wells, this is probably a good time to think about the transition of our community involvement and press efforts.

Kay Morrison is our Community Involvement Coordinator
Mark Macintyre is our Press officer

If your organizations can take the lead for these areas after our work concludes, Kay and Mark can provide information and documents already created and then take a back seat to your organizations. My hope is to have a seamless transition for those external parties interested in the good work being done at the property.

Please let us know if this works for you.

Thanks,
Wally

Hi Jeff,

I'm checking with our solid waste experts. However, it appears that King Co would be able to better answer the questions.

Jim may be on vacation. I could give her a call in the meantime.

Thank you,
Tom

James/Tom,

Ms. Julie Hardeback (425-591-7234) owns the home and the boarding stable to the immediate SE (downhill) of the Pillon property. She called EPA's Community Involvement Coordinator and then I spoke

with her regarding the long-term cleanup plans. I told her we were finishing the first phase of our work by Saturday, the removal of the hazardous substances. She has lots of questions and concerns regarding the plans for the solid waste removal. In particular, she mentioned drums and buckets that roll down the slope onto her property, the boat sitting precariously on the edge of a steep slope directly uphill of her stable, and concerns regarding the surface water that has formed lakes on her property before Mr. Pillon's surface water management system was installed. I told her that we were coordinating with King County and Ecology for follow-on work, but that I did not know the specific plans or timelines. She asked for a number to call you. I told her I would find out who she should speak to and have you call her. Will you guys let me know what your plans are and at least one of you call her back?
